

merton partners | training & staffing

build a flexible organization: agile, effective, available

competency & skilling...

Global competition, innovation, and diminishing transaction costs require constant updating of an organization's skills.

Does your organization understand the complexity of key processes ... have the right resources, in the right place, in the right amount ... mobilize & deliver initiatives quickly ... speak in terms of:

- six sigma – design & optimization
- lean & KAIZEN – value flow
- quality engineering – experimental design
- change management – energy & buy-in?

contractors & resourcing...

When allocating resources to new opportunities, play it safe. Invest prudently by maintaining a variable resource pool – for critical projects and time-limited initiatives.

Temporarily embed objective coaches with expertise in:

- operational excellence & continuous improvement
- project & initiatives management
- team & change management
- benchmarking & surveys
- initiative design & implementation

we bring training & temporary staffing...

- **Corporate Initiatives** – value stream mapping / integration & consolidation / start-ups
- **Analytical & Statistical Tools** – multivariate analysis / modeling / design of experiments
- **Project & Program Management** – analysis / design / implementation coaching
- **Change Management & Mobilization** – team dynamics / alignment / pace of change
- **Functional Managers** – strategic planning / operations manager / HR / engineering / facilities

Exceptional people. Exceptional results.
